Figure 4. Reliability curves (calibration)
Virginia hold-out test set (n=5,781)

Before isotonic recalibration

- - - - Perfect calibration
- Meta-ensemble (ECE=0.011)
- Source-only (ECE=0.744)

Observed event fraction

Mean predicted probability

After isotonic recalibration

- - - - Perfect calibration
- Meta-ensemble (ECE=0.011)
- Source-only (ECE=0.028)

Observed event fraction

Mean predicted probability
